INTERNATIONAL COFFEE ORGANIZATION

Title: Coffee Sustainability Mapping Tool

Organisation: International Coffee Organisation.

Location: London, UK (remote).

Description: The International Coffee Organization is looking for a contractor to redesign and implement a platform visualizing a dataset (around 440 observations) of sustainability initiatives and projects in the global coffee value chain. The dataset contains variables covering beneficiary countries, donors, implementing partners, SDGs, production, export volumes, export values.

The current tool is available in the following link and a closer idea of what we are envisioning is found in this link. We are interested in reaching a more user-friendly, engaging and accessible tool that would allow our coffee stakeholders to support a more sustainable coffee sector.

Start date: As soon as possible.

If interested, please reach out to ocampo@ico.org with a brief introduction, your portfolio and an estimated quote.
